Make Your Holidays a Little Brighter and Happier with a New Kitchen Faucet. Because if YOU Don't, Who Will?

Whether you're remodeling, have an old leaky faucet, or are simply looking for a way to update your kitchen, choosing a kitchen faucet can be a lot to take on all by itself! From choosing the finish, number of handles, or thinking about pulling the faucet out or down, it's not just A or B anymore and that can be a tad overwhelming!

So from our house to yours, here are the top five things to consider to help guide through the selection process. And, needless to say, Your 1 Plumber is always available to answer your questions and make a suggestion or two of our own.

1. How many holes are in your existing sink

Unless you are starting from scratch, keep in mind what is already in your kitchen. By knowing how many holes your previous faucet had, it's easier to tailor your search because this criteria needs

to be met. One detail to keep in mind is that a lot of faucet manufacturers offer optional deck plates so if you currently have 3 holes, and want a single-hole faucet, it is easy to cover up!

2. How many handles?

Two handles allows you to mix the hot and cold water, while one handle allows you to adjust the water temperature with a single motion.

Green & Healthy Living Tips

Get a Good Pair of Sneakers. Is your energy lagging? Though it may be the last thing you feel like doing when you're tired, exercise -- even a brisk walk -- can be more effective than a nap or cup of coffee at fighting fatigue.

3. Is a sprayer a necessity?

Keeping in mind how you are using the faucet will help you to decide if a multi-function spray faucet would be ideal, a side spray, or no sprayer at all.

4. What are you using it for?

This is a big question! Do you wash most of your dishes with your faucet or use it mainly for rinsing? If large pots and pans are constantly filling up the sink, a sink with an arched neck might help with the functionality. On the contrary, if a lower sink works for you, or you have a smaller kitchen, something that goes straight out might go well with your kitchen.

5. What's your style?

The latest rage in kitchen faucets is simple and chic. On the flipside, there's a renewed interest in classic models as well as rustic, farmhouse-style models. To make things even more fun (or confusing?), you also have a broader range of shapes, sizes, and finishes to choose from than ever before.

At Your 1 Plumber, we're pleased to offer **you a \$35 savings on any new or replacement faucet with the coupon on page 3 of this newsletter.** And that goes for kitchen, bath, lavatory, and tub & shower faucets alike. [Visit our web site](#) today for more details, or call us and tell us what you have in mind.

And above all, happy holidays from all of us at Your 1 Plumber.
