How to Make Your Home a Whole Lot Greener for St. Patrick's Day, and All Year Long.

What's not to like about the color green this time of year?

Green symbolizes not just St. Patrick's Day, but the return of spring, and the effort we all make to live healthier and more energy efficient lives.

Well, now you can take a big step forward in that regard with a new water heater from Your 1 Plumber. But not just any water heater, because right now, we're offering "next generation" water heaters that can help you save up to \$350 per year on your hot water related energy costs.

Here's what's available now from Your 1 Plumber:

Gas Condensing Water Heaters – Rather than venting natural or propane gas through the system's flue, **the gas is reclaimed so that greater amounts of hot water can be generated from the same amount of gas.** That improves energy efficiency, cuts down on greenhouse emissions, and will help you save about \$100 per year in water heater energy costs.

Electric Hybrid Heat Pump Water Heaters – Think of a refrigerator working in reverse, and then you'll get the concept of an electric hybrid water heater...**the next generation of electric storage tank water heaters.** The heat pump component of a hybrid system draws warm, ambient air to assist in heating the water inside the storage tank. The net result? You can **expect to save up to \$350 per year** in water heater operating costs.

Green & Healthy Living Tips

Take Tulsi. Research suggests that this Ayurvedic herb, also called holy basil, may help manage levels of the stress hormone cortisol, helping to boost your mood.

- ✓ Our Favorite Recipe
- ✓ Amazing Fact
- ✓ "You Gotta Laugh"

Gas condensing and electric hybrid water heaters – as you might recall from last month's issue of Close to Home – are here to replace conventional gas and electric storage tank water heaters.

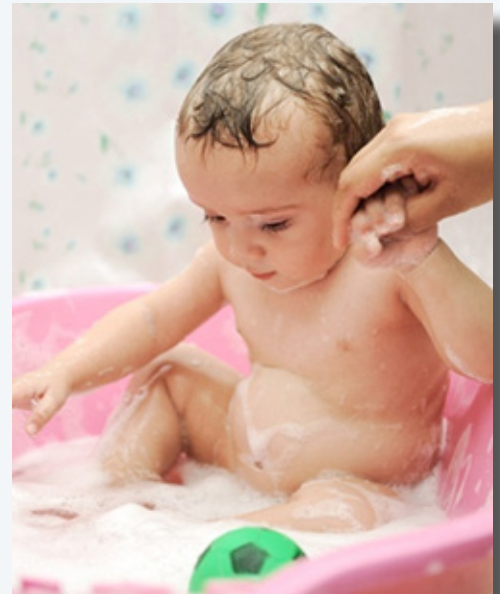

In fact, **the latter will no longer be manufactured in the US as of April 16 of this year.** And while the new, higher efficiency water heaters will cost more than the units they're designed to replace, you'll more than make up the difference in energy savings over the life of your replacement system.

Come to think of it, if you've even been thinking about replacing your water heater, chances are **you'll never again have an opportunity like this one.** Because right now, we still have conventional gas and electric systems available, but only while supplies last. Or, you can opt for one of the new, higher efficiency models.

And yet, no matter which style of water heater you choose, **you'll save \$50 with the coupon on page 3 of this newsletter.**

Until then, we wish you a very Happy St. Patrick's Day and Happy First Day of Spring.

William Kirkorian
President

Amazing Fact

After each player has moved three times in a chess match, there are 121 million possible routes that the match could follow.
