## What to do About Your Plumbing? Of Course: Prepare for the Worst, and Hope for the Best.

Last year, we had the kind of winter most people dread and count the weeks and days until it's finally over. The kind of winter that featured plenty of cold air, and more than enough snow to go around.

As a result, valued customers like you suffered through a rash of plumbing problems and related damage, including burst pipes, basement water damage, and more.

To help protect your home from the wrath of winter, we're pleased to recommend these fall plumbing maintenance tips:

- **Insulate all water pipes** in unheated areas of your home, including your garage and crawl spaces.
- **Shut off the water** to all outdoor faucets and hose bibs.
- **Clear your gutters of leaves and other debris** to help prevent ice dams. These can back up, damage your roof and, once the ice starts to melt, leak water into your attic.
- **Remove all liquid from your lawn sprinkler system** to prevent it from freezing. The best way to accomplish that is by hiring a professional to clear the system with compressed air.

## Green & Healthy Living Tips

**Reduce Your Sodium Intake.** Use the Nutrition Facts label to choose lower sodium versions of foods like soup, bread, and frozen meals. Select canned foods labeled "low sodium," "reduced sodium," or "no salt added."

- **Thoroughly check your sump pump** by pouring a bucket of water into the pit and then turning the pump on, making sure all water is removed.
- To play it extra safe, **contact us about a back-up sump pump**. We offer two kinds (battery- and water-powered) that turn on automatically should your home lose power or your main pump stop working for any other reason.
- Finally, it's important to **know where your water main shut-off valve is located**. If a pipe freezes and bursts, you'll want to shut that valve off as quickly as possible to reduce the potential for damage. You should also test the shutoff valve to ensure that it's working properly in case an emergency arises.

For a higher level of preparedness, we invite you to contact Your 1 Plumber today to request our whole-house plumbing inspection. It's a service that should be performed by a licensed plumber once a year under even the best of circumstances. Plus, if you call now, **you'll pay just \$89 with the coupon on page 3 of this issue of Close to Home**....the one place you can always find Your 1 Plumber..

## Amazing Fact

There is a glacier called "Blood Falls" in Antarctica that regularly pours out red liquid, making it look like the ice is bleeding. It's actually oxidized salty water.
